The presentation went well, and we were able to clearly message about the great work ORD does to support our partners from across the Agency, our Federal partners and states and tribes. During the discussion, OMB noted that they will be looking to a future mapping of how ORD's research is linked to EPA's authorizing statutes, and they will be setting up a separate meeting to talk about IRIS' plans, noting ongoing high level interest in this program. OPARM will be sending out information on specific follow-up actions to the appropriate parts of ORD, so please stay tuned.
